

The original Razor Blade Covers were printed on a light weight white paper. Typing paper should work fine, but is a little bit heavier than the originals. A paper just lighter than copy paper would be great. Cut the covers out by cutting along the edges of the printed area. The razor blade is placed in the center (back side - white) then the side tabs are folded in, followed by the top flap (with Made by info), and then the bottom tab is folded. 5 blades were issued at a time.
